AbiWord 2.0 - The Next Step
(OpenOffice Word Compatible)
Made in France and Europe for Europe

New features in 2.0

AbiWord 2.0 has many new features not present in the 1.9 release. These are features that provide improvements to the AbiWord User Interface and those that increase the robustness of the Word Processing program. The following table lists new Word Processing features and the file formats to which it is supported in and supported from. (Of course all features are supported by the AbiWord core ODF file format)

Table	Feature	Supported From	Supported to:
Text	MS Word, RTT, RichText, ODF, OpenOffice.org, Text, RichText, HTML, OpenOffice.org, Text, RichText, HTML, OpenOffice.org	RTT, HTML, LaTeX, OpenOffice.org, Text, RichText, HTML, OpenOffice.org	RTT, HTML, LaTeX, OpenOffice.org, Text, RichText, HTML, OpenOffice.org
